

## Integrative Energy Tasks Platform Support

---

### The Process for Certified HVAC contractors:

#### Join the Program!

*(\$25 enrollment goes to AHERO)*

Find and Energy Rater in your area and encourage them to join with you.\*

#### Sign up for the Training Class!

*(Energy Raters should attend the class with you as part of your Performance Team)*

#### Try the Demonstration version Elite Software. (You will need this to attend the class)

The HVAC Contractor along with the Energy Raters and other Sub-Contractors will learn that “The Integrative Marketing” relationship can work to their mutual benefit. First, the HVAC Company can benefit from having an Energy Rater that can provide qualified leads to the HVAC Contractor for highly profitable work. Design concepts and controls over how the prescriptive solutions are done becomes a team effort. The HVAC Contractor, Energy Rater and other Sub-Contractor’s become allies in offering more energy efficient ways to improve the quality of the customer’s home and a quantitative way of proving the work was completed correctly.

Additionally the HVAC Contractor, Energy Rater and other Sub-Contractor’s will learn what Job Survey information needs to be obtained to generate an accurate Load Calculation. This will lead to creating better communication tools for helping the customer better understand what needs to be done and the best path to achieving the energy saving goals that are proscribed.

With a better understanding of how to profit with Elite Software you can decide upon which Elite Software Titles you wish purchase. The first training sessions will help you focus on your future needs for “Task Oriented Training Sessions” to peak your performance skills and help your sub-contracting team be successful with you. We know that you will be able to quickly move your Integrative Support Team forward for successful recruiting and closing of profitable sales so you can...

#### Go out and use the knowledge in growing your business!

Best Green Energy Solutions, Inc. also offers:

- Discounted prices for Elite Software Suite
- Preferred pricing for Custom Marketing materials from BGES
- Preferred pricing for Preliminary Load Calculations from BGES
- Consulting services from BGES

\*Additional people who you might want to encourage join the program would be Architects, Engineers, or Builders.
